**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Kraguljac (Reg. No. 38,520) on October 2, 2009.

1. The application has been amended as follows:

**In the claims:**

**Please amend claim 23 as follows:**

Please replace entire claim with —A method by which a computer interacts with a handheld device, the method comprising the following:

waking the computer from a sleep mode in response to the computer receiving a wireless communication directly from the handheld device with no intervening devices and no intermediary devices;

recognizing the wireless communication by the computer;

responding to the wireless communication by the computer, including the following :

generating and transmitting an event notification message to the handheld device,  
where the event notification message includes information related to the wireless communication;

waiting for an acknowledgement of the event notification message from the handheld device,  
resending the event notification message upon failing to receive the acknowledgment for a up to selected number of times; and,  
returning the computer to the sleep mode after receiving the acknowledgement or  
resending the event notification message for the selected number of times--

**Please amend claim 26 as follows:**

Please replace entire claim with --A method by which a computer interacts, the method comprising:

waking the computer from a sleep mode in response to the computer receiving a wireless communication directly from a cellular phone device with no intervening devices and no intermediary devices;

recognizing the wireless communication by the computer;

if the wireless communication is a request for calendar related data from within the computer, performing an action by executing a calendaring program in response to the wireless communication by the computer that retrieves the calendar related data and wirelessly transmits the calendar related data to the cellular phone device;

waiting for an acknowledgement from the cellular phone device,

resending the calendar related data upon failing to receive the acknowledgment; and,

returning the computer to the sleep mode in response to transmitting the calendar related data after receiving the acknowledgement or resending the calendar related data for a selected number of times.--

**Please amend claim 29 as follows:**

Please replace entire claim with --Storage media, the storage media storing software which when executing on a computer performs a method by which the computer interacts with a handheld device, the method comprising the following:

waking the computer from a sleep mode in response to the computer receiving a wireless communication directly from the handheld device with no intervening devices and no intermediary devices;

recognizing the wireless communication by the computer;

generating and transmitting an event notification message to the hand held device, where the event notification message includes information related to the wireless communication;

if the wireless communication is a request for calendar related data from within the computer, performing an action in response to the wireless communication by the computer including executing a calendaring program that retrieves the calendar related data and causes the calendar related data to be transmitted to the handheld device; and,

returning the computer to the sleep mode in response to performing the action.--
